

Mathtastic: Dancing with Mathematics!

What is math, anyway?
How many is a few?
How many is a bunch?
What do you call a group of
DRAGONS?

Mathtastic: Dancing with Mathematics is an exciting, participatory performance that investigates math concepts using music, movement and a curious collection of everyday objects.

- 35- minute show (approximately)
- Performed by four professional dancers
- Designed for 3rd through 5th grade elementary students and educators
- Poses intriguing math questions
- Links dance to classroom curricula

An accompanying activities packet invites classroom teachers and students to join the creative process. Through this process, using bodies, minds and imaginations, abstract concepts become tangible, understood and remembered.

Produced by Ormao Dance Company's Dance in Education Team, **Mathtastic: Dancing with Mathematics** was created by Karl Schaffer, a National Endowment for the Arts grant recipient and current Kennedy Center for the Performing Arts Touring Artist.

Ormao Dance Company is a not-for-profit professional modern dance company. Our goal is to bring premier, challenging modern dance performance and classes to Colorado Springs and Colorado as a whole. **WWW.ORMAODANCE.ORG**
